Mobile Security Monitoring

| | | | | |
|---------|-------------------------------------|---|---|---|
| Lookout | Lookout Mobile Endpoint Security |  | Lookout Mobile Endpoint Security helps organizations prevent data compromise via mobile devices, by delivering advanced security and comprehensive policy-based protection against the spectrum of mobile risk across the app, device, network and web & content vectors, thereby helping enterprises meet internal and regulatory compliance requirements for mobile endpoints. Lookout protects enterprises by leveraging deep security intelligence powered by a global network of 100M+ devices and a massive data set of 40M+ mobile apps. | <ul style="list-style-type: none">• iOS 9.0 or later• Android 4.1 or later |
|---------|-------------------------------------|---|---|---|

| | | | | |
|--------------------------|---|---|--|-----------------|
| Zimperium Mobile Defense | Zimperium |  | Zimperium provides real-time, on device monitoring of mobile threats. These threats can include malware, network-based attacks and jailbroken devices. Used in conjunction with the BlackBerry container provides the ultimate security to mobile devices. While the BlackBerry container is great for protecting data at rest and data in transit, Zimperium mitigates the risk from a compromised device – root access means attackers gain insight into data even if it is encrypted. | □ iOS & Android |
